**(54) COATING POWDER AND ITS PREPARATION**

**(57) Abstract:**

**PURPOSE:** To prepare a powder coating which can easily conduct toning of various colors by mere homogeneous blending of powder particles of two or more types having different colors.

**CONSTITUTION:** This coating powder comprises powder particles of two or more types having different colors. It can form a coating having an even color by mere coating and fusing thereof. The powder particles have an average particle diameter of pref. 1 to 17 $\mu$ m, still pref. 3 to less than 10 $\mu$ m, and a softening point of pref. 50 to 120°C, still

pref. 70 to 110°C. Pref., the powder particles are fine particles prep'd. from emulsion particles. For the powder particles, a resin selected from the group consisting of polystyrene, polyacrylic, polystyrene/acrylic, epoxy, and polyester resins is pref. used as a binder resin.
